

# VP485 / VP495

Full Color, Real-Time, On-Demand, In-House  
Label/Barcode Printer

## VP485

Introducing the VP485 digital desktop inkjet label/barcode printer from Fernqvist that prints full color labels on demand.

The printer is durable, suitable for both industrial and retail environments. It can handle all of your packaging and identification duties.

Print quantities from one label to thousands per day on rolls.

Powered by HP's reliable time tested technology, we're sure the VP485 will be your choice for your day-to-day full color label production.

The VP485 will enhance your operation. Produce quick, clean color labels when and where they are needed. Save money by reducing your label inventory and time in managing projects.

Print from the VP485 printer on to a variety of label materials available from Fernqvist. Paper and synthetic labels are available in hundreds of sizes. High gloss, Semigloss and matte paper and poly film are popular choices for the smudge resistant and water safe features they offer.

## VP495

Looking for a printer with the capabilities of the VP485, but needing more weather durability? Fernqvist introduces the VP495, a print-on-demand solution that generates labels that not only look great, but can take the demands of an outdoor life. With no added costs for secondary processes, like coating or lamination, these labels can be used outdoors, come rain or shine.

The complete VP485 and VP495 printing system includes four ink cartridges (one each cyan, magenta, yellow, and black), Print Heads (set of two), PC print driver, Bartender Ultralite by Seagull, and a powered unwinder.

### Grow your Business with Two Great Options

Install the VP485 or VP495 yourself and discover the power of custom color labels. From developing new business opportunities, to reducing process and handling issues, the VP485 and VP495 can help your business be more efficient and profitable!
